INNOVATIVE

We are pleased to introduce you to the dos PISTOLOS® Double Barreled Sprayer. It was born four years ago as an idea, then went through prototyping, testing, and is now being used by the largest right-of-way backpack applicators in America.

SIMPLE, RUGGED, FLEXIBLE

dos PISTOLOS® is made of cast aluminum and stainless steel. It only uses 9 different parts and 4 different O-rings. It accepts common inlets and outlets with 1/4" pipe threads. It can be serviced with a pocket knife, and a flathead screwdriver or coin. It can be changed from left handed to right handed by reversing four plugs in the head.

EFFICIENT & PRODUCTIVE

dos PISTOLOS® weighs the same as the industry standard Gunjet 30 with rollover valve, but it is much more ergonomically designed to improve efficiency and lessen fatigue. The applicator can choose one nozzle, the other nozzle, or both at once with the touch of a finger. The applicator can cover more ground, use less product, and produce better results-making you higher profits.
